

What is TAP Project Description

- Escape the Lab is an interactive game that introduces K–12 students and non-IT majors to programming. By using Makey Makey, players can control the game with everyday objects like apples or clay, turning a digital lesson into a hands-on experience.

Workshop Outcomes

- Our outreach workshops proved that a "play first, then learn" approach works. After participating, students reported:
- Increased Confidence: Coding felt less intimidating and easier to understand.
- Higher Interest: Many participants expressed a new desire to take programming courses.
- Greater Curiosity: The interactive nature of the game successfully sparked interest in IT topics.

Conclusion

- The workshop showed that game-based learning is effective for teaching programming concepts.
- Participants demonstrated:
- Increased confidence after the workshop (pre → post improvement shown in charts)
- Higher interest in programming, with many considering taking a programming course
- Greater curiosity toward IT topics
- The “play first, then learn” approach made coding:
 - Less intimidating
 - More engaging
 - Easier to understand

Processing Working Impact Report

• **Figure 1A: Workshop Rating and Confidence Change from Participants**

Overall workshop effectiveness & pre/post confidence shift

Workshop	Overall Rating	Engagement	Learning	Pre-Confidence	Post-Confidence	Change
Workshop 1 (N=14)	3.50	3.42	3.58	1.85	2.64	+0.79 ▲
Workshop 2 (N=20)	4.05	4.10	4.00	2.15	3.35	+1.20 ▲▲

OVERALL RATING & ENGAGEMENT (1-5)

CONFIDENCE CHANGE: PRE VS POST

• **Figure 1B: Confidence Boost Between IT and Non-IT Majors**

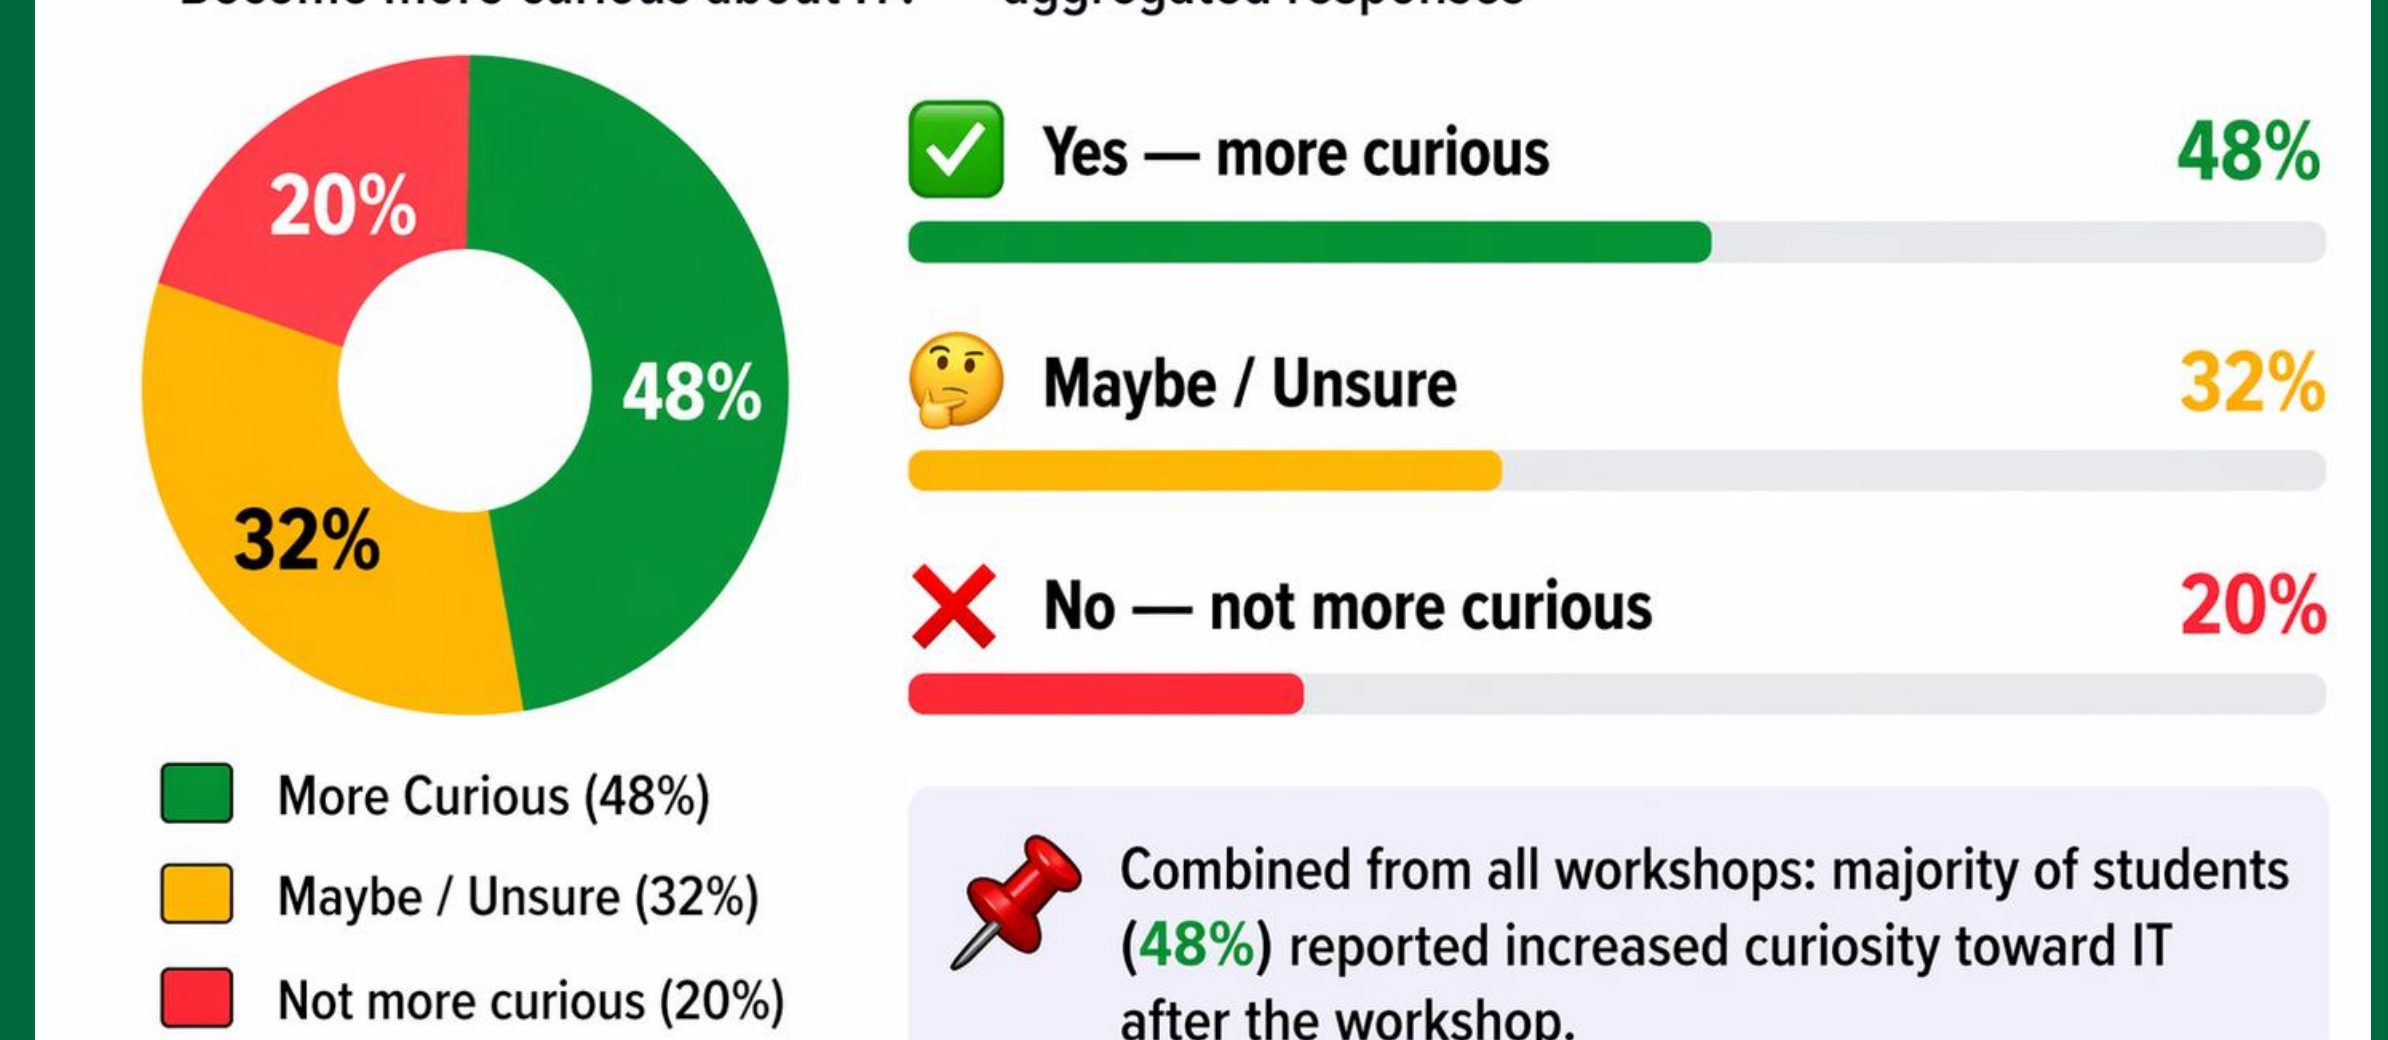

Programming confidence growth by academic background

	IT Major (N=10)	Non-IT Major (N=24)
Pre-Survey Confidence	2.72	1.94
Post-Survey Confidence	2.88	2.84
Gain ▲	+0.16	+0.90

• **Figure 2: Students' Curiosity Towards IT Post-Workshop**

“Become more curious about IT?” – aggregated responses

• **Figure 3: Students' Consideration of Taking a Programming Course**

“Would you consider taking a programming class?” – post-workshop intention
